EXECUTIVE SUMMARY

Quality Assurance Engineer with 4.5+ years of experience across Government, Healthcare, Banking, Retail, and Airline domains. Experienced in functional, API, and automation testing using Selenium, Playwright, and Postman, with a strong focus on delivering reliable, high-quality software. Passionate about leveraging AI-powered QA practices to accelerate test design, defect analysis,streamline documentation, and overall testing efficiency while collaborating effectively in Agile environments.

TECHNICAL SKILLS

Test Management & Methodologies: Test Case Preparation, Defect Tracking and Reporting, JIRA, Agile Methodologies
Programming Language: Core Java, TypeScript (Basics), SQL
Automation & API Testing: Selenium, Playwright, Cucumber, TestNG, WebdriverIO, Data Driven / BDD Framework, SoapUI, Postman, GraphQL, RestAssured (Basics)
Version Control & CI/CD Tools: GitLab, GitHub, Jenkins
AI Tools & Productivity: AI-Assisted Scripting (GitHub Copilot, Claude Code), Atlassian Rovo AI, Model Context Protocol

EXPERIENCE

Sharjah Airport International Free Zone (SAIF Zone) May 2026 – Present
Quality Assurance Engineer *Sharjah, UAE*
Project: *SAIF Zone Management Information System (MIS)*

A large-scale Government ERP and Investor Services platform developed for SAIF Zone, enabling digital investor services through a self-service portal and integrated ERP. Built as a web-based enterprise application with REST APIs, role-based workflows, and centralized business processes for visa, licensing, compliance, finance, and operations.

- Introduced AI-driven QA workflows using **Claude Code** and **MCP** to streamline epic creation, test design, and defect management, significantly reducing documentation effort, and accelerating delivery cycles.
- Customized and enhanced a **Playwright + TypeScript** automation framework to automate key business workflows across investor and internal ERP applications, enabling scalable regression testing.
- Worked closely with business stakeholders to shape requirements, clarify business workflows, and define acceptance criteria before development, while identifying and reporting **150+ functional defects** that improved product quality.

UST Global June 2025 – May 2026
Quality Software Engineer *Trivandrum, India*
Project: *Castorama – Kingfisher Plc*

Castorama is a native iOS and Android retail e-commerce application supporting end-to-end shopping for DIY, home improvement, and household products, enabling customers to browse products, check availability, and place orders across multiple banners, backed by GraphQL APIs.

- Designed and implemented a BDD-based Playwright automation framework focused on **GraphQL API testing**, resulting in a **50% increase in automation coverage** across multiple banners and environments.
- Actively participated in **code reviews**, collaborating with developers to improve **unit test quality** and strengthen overall **E2E test coverage**.
- Worked within the application's development repository to manage local deployments, configure environment specific data, and support CI/CD pipelines to ensure accurate deployments across environments.
- Collaborated closely with Product Owners to review user stories, provide test effort estimations, identify risks early, and define quality acceptance criteria before development.
- Leveraged AI-assisted development tools (GitHub Copilot, Claude Code) to accelerate test script development and enhance automation productivity.
- Performed cross-platform mobile UI validations on Android/iOS by correlating user interactions with GraphQL API execution and identifying backend integration and data consistency issues.

- Performed functional and integration testing of AI-powered chatbot features, validating conversation workflows, response accuracy, and API interactions.

Edgeverve Systems Limited January 2025 – June 2025
Test Engineer *Chennai, India*
Project: *Wealth Management System*
The Wealth Management System simplifies portfolio management by integrating financial modules like Bonds, Equity, Mutual Funds, and Payments. It provides users with an intuitive interface for tracking investments and generating reports.

- Performed end-to-end testing and integration validation for financial systems, ensuring accurate data flow, correct display of financial data, and seamless transactions across banking platforms.
- Extended an existing BDD framework by automating test scripts, leveraging GitHub Copilot in VS Code for efficiency, configured Jenkins pipelines for end-to-end testing, and integrated multiple test suites.
- Applied risk-based testing strategies to prioritize high-impact financial scenarios, reducing the likelihood of critical defects in production releases.

Cognizant Technology Solutions July 2022 – December 2024
Test Automation Associate *Coimbatore, India*
Project: *Billing - Aetna, CVS Health*
Billing application simplifies monthly premium payments with an intuitive UI for viewing invoice details through features and interactive charts, enabling users to efficiently manage employee plans, rates, and generate quotes.

- Implemented a Hybrid Test Automation Framework using Selenium WebDriver, Java, and TestNG, resulting in a **40% increase in test automation coverage** across multiple applications.
- Led API testing for a large-scale migration project and automated it using the **Karate BDD framework**, successfully delivering **300 APIs within three months** while significantly reducing manual effort.
- Managed and enhanced the automation framework, developed **1000+ regression test cases**, maintained the GitHub repository and logged defects with **over 95% accuracy**.
- Analyzed business requirements and collaborated with stakeholders to define test scope, prepare test strategies, and ensure comprehensive coverage.
- Provided training and guidance to team members on automation tools and framework usage, improving overall team productivity.

EDUCATION

Madras Institute of Technology 2018 - 2022
Bachelor of Technology — CGPA: 7.96 / 10.00 *Chennai, India*

St. Mary's Higher Secondary School 2016 - 2018
High School — Scored: 93.5% (2nd Rank in School) *Kanyakumari, India*

CERTIFICATION

- Selenium WebDriver MasterClass with Java & Cucumber BDD + Automation Framework Design – Udemy.
- **GenAI & AI Agents for QA Test Automation — Copilot & Claude** – Udemy
- Cleared Exam on **AZ-900:Microsoft Azure Fundamentals**.

PROJECT

Developed a reusable Cucumber BDD framework using Selenium, Java, Page Object Model, Log4j, property files, and Extent Reports to test web applications like EaseMyTrip.com and OneCognizant.com.
